

JORGE FERREIRA

Junior Developer

About Me

I am a third-year Computer Engineering student with a strong interest in programming and a particular focus on web development. I have experience in frontend development with Next.js, Android development with Kotlin, and foundational knowledge in backend and databases. I value the visual and creative side of development, which is why I enjoy working in UX/UI and designing functional, intuitive user interfaces. More recently, I have been deepening my knowledge in Artificial Intelligence, integrating these skills into my technical journey to create useful, innovative, and impactful solutions.

Education

Bachelor's Degree in Computer Engineering IADE - Creative University

- Web development with Next.js and TypeScript;
- Skills in UX/UI Design and creation of functional interfaces;
- Mobile application development (Android/Kotlin);
- Backend development with Java / Spring Boot;
- Programming in C and solid foundations in SQL;
- Training in Distributed Systems and AI Algorithms.
